

BUSBAR SYSTEMS SUPPORTS WITH SPACING 100 AND 185 mm

D100/185

KD-D100/185

Basic description

- Busbar system supports D100/185 is intended for busbar fastening in distribution boxes and low-voltage systems. The busbar system support is made of glass reinforced polyester. The support design as well as material provide high resistance to dynamic effects of short-circuit current.
- Low structural height and easy mounting.
- For busbar systems with spacing 100 and 185 mm.
- Possibility of protection by a front cover.
- The package contains:
 - 1 bracket.
